

SaaS-based Unified Monitoring for Enterprise IT

On-prem. Cloud. Microservices.

The dependence of business outcomes on IT performance is clearer today than ever before. Customer requirements for greater speed, security, and availability are causing a shift toward new, more advanced technologies, and infrastructure must evolve rapidly to keep up. LogicMonitor is the only SaaS-based monitoring platform that can provide comprehensive visibility into your entire hybrid infrastructure.

- Integrate monitoring seamlessly into your evolving technology stack.
- Maintain visibility as you expand and migrate workloads.
- Drive innovation with the confidence that your infrastructure is supported.

Integrate Seamlessly

Flexible SaaS architecture works with any deployment model: on-prem, cloud, and hybrid.

Maintain Visibility

Get actionable insights and granular visibility into complex and changing environments.

Drive Innovation

Empower IT teams to support new technologies and deliver on customer expectations.

It's About Business Value

A Solution that Pays Dividend

Leverage an automated, SaaS-based solution to avoid the manual, resource intensive configuration and ongoing maintenance required by on-prem tools.

Improve Knowledge-Sharing

Encourage collaboration and information-sharing across all teams and departments. LogicMonitor's unified monitoring platform creates a single source of truth.

Part of a Comprehensive Tool Strategy

Powerful integrations with best-in-class solutions like ServiceNow, Slack, and PagerDuty make LogicMonitor compatible with your existing toolset.

Extend Technical Expertise

Deepen organizational knowledge with a robust, enterprise-grade training and certification program. Leverage 24x7 live support with technical engineers for quick, expert answers.

"For an Enterprise with a large and complex critical infrastructure undergoing many architectural shifts, there is no platform other than LogicMonitor that can give us the agility we need."

-Reza Salari, Manager of Information, Security & Telemetry, Pacific Life Insurance

"Until we adopted LogicMonitor, Ted's IT teams had no single place to go and visualize current and historical availability, performance, and capacity."

-Stuart Carrison, Head of IT, Ted Baker

"LogicMonitor allows us to focus on our core competency of building the best enterprise applications for our customers."

-Durga Dash, Director of Cloud Operations, Infor

LogicMonitor's unified monitoring platform expands possibilities for businesses by advancing the technology behind them.
