Elevate COMMUNITY CONFERENCE

Unifying infrastructure + digital experience visibility

A practical walkthrough of how LogicMonitor connects user impact to infrastructure cause—and help teams move from alert to action faster.

Elevate
COMMUNITY CONFERENCE

Agenda

1. Introduction
2. The gap: disconnected systems
3. The value: one connected view
4. Demo: alert → impact → cause
5. Recap: faster, targeted decisions

Before Unifying Our Platforms

Separate systems made it hard to connect customer impact to infrastructure cause.
No shared timeline meant teams had to correlate the story by hand.

Digital experience

User-impact signals lived in a separate workflow

Infrastructure health

Hosts, databases, and alerts lived in another

Application context

Traces and logs had to be correlated manually

An alert is only the beginning

A database signal raises the real question:

Are customers feeling the impact?

And where should the investigation focus?

© 2026 LogicMonitor · Confidential and proprietary

LogicMonitor help teams answer the question faster

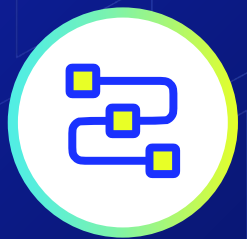

Are users impacted—and where should I focus?

Less alert noise

Faster prioritization

More targeted remediation
